

Free Multi-Family Toilets

You may be eligible to participate in the LOTT Alliance High-Efficiency Toilet Replacement Program – a program where proven, state-of-the-art, high-efficiency toilet (HET) fixtures are available free to eligible multi-family customers served by the LOTT sewer system.

HETs use an average of 1.2 gallons per flush. If you currently have toilets that use 3.5 gallons per flush or more (installed prior to 1994), you can save an average of 31 gallons per day, or over 11,315 gallons per year, by installing HET fixtures!

Water conservation resulting from the program reduces wastewater flows to LOTT’s treatment facilities, and may help delay the need to build new treatment capacity. Water conservation may also save you money on your water utility bill.

You can choose between two high-performance, high-efficiency toilet models. Both models are available for viewing at LOTT’s WET Science Center, located at 500 Adams Street NE in Olympia. The Center is open to the public Monday through Saturday, 10:00 am to 4:00 pm.

Kohler Highline Pressure Lite K-3519-HE

- Good choice for frequent and heavy use
- Pressure-Assist technology averages 1.1 gallons per flush
- MaP testing score of 1000 grams – great performance
- Elongated, ADA-height bowl with seat approximately 18.5” high
- Use of cleaning products in tank disallowed
- Louder flushing sound than standard fixtures

Kohler Cimarron EcoSmart K-3496-HE

- Good choice for normal use
- Single Flush Gravity technology averages 1.28 gallons per flush
- Technology most similar to standard residential toilet
- MaP testing score of 800 grams – solid performance
- Elongated, comfort-height bowl with seat approximately 17.5” high
- Normal flushing sound
