Grease Interceptor(s)

What type of grease interceptor does your facility have?

☐

Hydromechanical*1

☐

Gravity *2

☐

None

*1 Hydromechanical grease interceptors (aka grease traps) are small (20-75 gallons) and typically located inside.

*2 Gravity grease interceptors are large (300-3000 gallons), located outside, and typically have manhole covers.

Where is the grease interceptor located and what is it's size (if known)?

How often is the grease interceptor cleaned?

Who cleans the grease interceptor?

If the grease interceptor is cleaned by staff, please include a copy of your maintenance log (if kept).

If the grease interceptor is cleaned by a pumping company, what is the name of the pumping company?

Certification of survey accuracy:

I certify under penalty of law, that this document, and any attachments, were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for willful violations.
