Grease Interceptor Information

What brand of grease interceptor is used at your establishment? (If known) _____

What type of grease interceptor does your facility have?

☐ Hydromechanical grease interceptor (grease trap) – small (20-100 gallons), typically located inside

☐ Gravity grease interceptor – large (100-3000 gallons), typically located outside, polycarbonate or iron utility covers

Who cleans your grease interceptor? (Choose one or both)

☐ Self-cleaned –Include a copy of your maintenance log and photo of the cleaned interceptor

How do you manage grease and food sediment that you remove?

☐ Pumping Company – Include a copy of your most recent pump-out report

Which grease pumping company cleans your grease interceptor?

How often is your grease interceptor currently cleaned, and what is your proposed cleaning frequency?

What is your grease interceptor manufacturer's recommended cleaning frequency? *(If known)*

_____ is requesting LOTT to grant a variance to the grease interceptor cleaning frequencies specified in the LOTT regulations. I certify that the above information is true to the best of my knowledge, and request that LOTT conduct facility inspections to check the operational condition of my grease interceptor, and to measure grease and sediment levels to determine an adequate cleaning frequency.
